# Join Webinars to Learn About Three Relay Services

Monthly webinars are available for people with hearing loss and/or speech disabilities, as well as for agencies and advocates interested in Relay NC and STS NC services.

Relay Conference Captioning (RCC)

Would you like to join a conference call or webinar? With our RCC service, you can read live captions directly on your laptop, tablet, or mobile device.

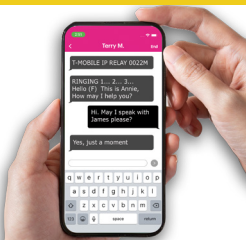

Speech-to-Speech (STS)

The service is for people with speech disabilities or those using voice synthesizers. It covers STS features, how to use STS services, and tips for making the most of the service.

Internet Protocol (IP) Relay

This service is for people who have hearing loss or speech disability by allowing a relay operator to read their typed messages aloud during phone calls.

Relay NORTH CAROLINA
